

Salt Water Pool Coating Systems

Using RAMUC Pool Paints

Pools with salt water systems can be successfully painted using epoxy coatings such as RAMUC **Type EP Epoxy** or RAMUC **EP Hi Build Epoxy**.

If painting a previously painted pool, please follow instructions on the RAMUC website for Previously Painted Pools. Use the compatible paint as listed above.

If painting bare or sandblasted concrete or plaster, or fiberglass, follow the instructions for bare surfaces. We recommend using RAMUC EP Hi Build Epoxy on any bare surface, particularly for salt water pool protection.
