## POOL PAINT SELECTOR

### Hi-Build™ Epoxy Pool Paint

### EP™ Epoxy Pool Paint

### DS™ Water-Based Acrylic Pool Paint

### A-2™ Premium Rubber-Based Paint

### Type A™ Chlorinated Rubber

### Pro 2000™ Chlorinated Rubber

### Ultra Pro 2000™ Low VOC Synthetic

## EPOXY COATINGS

Epoxy Coatings provide a hard, tough, durable finish with unsurpassed stain, chemical and abrasion resistance. Because of their chemical cures, epoxies are the coating of choice for pools, spas and whirlpools. These two component coatings roll on easily.

## WATER-BASED ACRYLICS

Acrylic Coatings can be applied to almost any painted surface, will clean up with soap and water, and are the paint of choice where short down times are critical. Acrylic coatings can be applied over a damp surface. Wears faster than a solvent based coating.

## RUBBER-BASED

Two types available – chlorinated and synthetic. Both offer excellent performance, durability, chemical resistance and color retention. Formulated to provide excellent hiding and superior coverage rates. Easy to apply. Excellent for pools, fountains and ponds.

# Color Selector

## SURFACE COLORS

Aqua Green

Beach Beige

Dawn Blue

Edgewater Gray

Monument Gray

White

## ACCENT COLORS

Black

Dark Blue

Royal Blue

Vermillion

*RAMUC does NOT recommend painting full surface pool, fountain or pond with dark or accent colors.*

## RAMUC POOL COPING

### Coping Spray Paint™

Renew the vibrancy of pool coping with Coping Spray Paint by RAMUC Pool Specialty Coatings Systems. Avoid expensive and time-consuming coping removal by using RAMUC COPING SPRAY to brighten, restore the appeal and protect the existing coping material. Easy to use, environmentally safe, and economical. Gloss White Finish.

## SURFACE PREPARATION

Prep is the keystone to great results - Why waste your time painting if you haven't prepared your surface properly? Know your job is being done right with our world-class solution.

### Clean & Prep Solution™

Used to clean and degrease while simultaneously dissolving mineral deposits, increasing porosity for good adhesion on surfaces prior to painting.
